

## Savvy Mom

### Ultra-fast Dry Towel

*Good for:* Any occasion where water is involved

*Why It Made the List:* There's never enough towels in the summer, whether it's the lake, pool or sprinkler to blame. And the only thing worse than smelly, damp towels is not having one at all, which is why we were excited to discover the antimicrobial and super-absorbent Ultra-fast Dry Towel from mom-run Discovery Trekking. Perfect for sending to camp or for keeping in the car in case a pool invitation comes along, the towels offer over 97% UV protection so they can double as a cover up or stroller shade, and sand does not stick to them, making them great for a beach blanket, too. With 16 different colours, everyone can have their favourite. (*\$19.95 for the medium size, available from [discoverytrekking.com](http://discoverytrekking.com)*)
